A HELPING HAND... Two El Camino coeds get an assist and a head start—in their fall semester studies from MTA operator Donald W. Houghtaling. The coeds are Marie Gantner and Karen Sake. MTA service to the area college will begin on Sept. 11 as school opens.

MTA Begins Service to El Camino
Officials of the Metropolitan Transit Authority this week announced several improvements in services to El Camino College. The new service will be inaugurated Sept. 11, when school opens.

Add Tank Cars To Linde Co. NASA Delivery
A new fleet of jumbo rail road tank cars hit the rails this week as Linde Co., division of Union Carbide Corp., began regularly scheduled coast-to-coast shipment of liquid hydrogen. Although outwardly similar to the popular jumbo car used for LPG and bulk chemicals, Linde's new rolling stock features unique inner construction—a double-walled container insulated by vacuum Super Insulation to protect its ultra-cold liquid hydrogen car go which is 423 degrees below zero.

Coast-to-coast shipping of liquid hydrogen is a part of Linde's \$31-million supply contract awarded by National Aeronautics and Space Administration last December. The company has been operating a six-ton-per-day liquid hydrogen plant in Torrance for more than a year, and is currently building a 26-ton-per-day facility at Ontario, California, to meet growing supply requirements. Linde's transport fleet will keep West Coast rocket development centers supplied with liquid hydrogen from the government's production facility at West Palm Beach, Fla., until the Ontario installation is put into operation in mid-62.

Through a combination of highly specialized engineering skills—Linde's cryogenic engineering know-how and General American Transportation Corps' extensive experience in tank car design and construction—the first liquid hydrogen jumbo was placed in service less than eight months after planning began. General American fabricated the outer shell and underframe at its Sharon, Penn., plant; inner tank construction, insulation final assembly and leak testing were performed at Linde's Tonawanda, N.Y., factory.

In addition to the new jumbo tank cars, Linde will utilize 30 standard, 95000-gallon tank cars converted from liquid oxygen-nitrogen service, and twelve 78000-gallon truck trailers specially designed for liquid hydrogen from the jumbo tank cars at the end of their cross-country run.

Harbor Bird Hobbyists at Lomita Meet
The Harbor Bird Hobbyists club met at the home of Mr. and Mrs. W. E. McDaniels of Lomita recently.

Luncheon was served at 1:30 p.m., followed by the business meeting. The guest speaker was Lee Moody of the B.A.C. Chapter 1. His subject was the genetics of Budgerigars, which was very interesting and informative.

Horace Polk, Mercer, and Mrs. McDaniels were appointed as a committee to work on the project for displaying of foreign birds at the Oct. 15 B.A.C. show in Long Beach.

Guests were James Duroy of Torrance and Mrs. and Mrs. Niemczak of La Mirada. There are two more new members, Mr. and Mrs. Michael Phillips of Bellflower.

Regular members attending were Mrs. Clara Neiland; Mrs. Carrol Vernon; Mr. and Mrs. Robert Hilborn and Robin; Mr. and Mrs. Ralph Kfox; Mr. and Mrs. Carl Lewis; Mr. and Mrs. John Tresler; and Mrs. Horace Polk.

Anyone interested in the club and would like to attend as a guest, please call Mrs. Betty Tresler at FA 8-5483 evenings for information.

September is a good month to plant native trees and shrubs—most of which take little water once they're established.
