# What a difference a year makes!

If anyone had told him, a short while ago, that his 1961 Cadillac could be improved on—he would have regarded them with disbelief.

And yet, after only half an hour in the newest "car of cars", he knows that a year of Cadillac progress has made a world of difference.

In fact, the list of Cadillac advancements for 1962 embraces each of the great motoring virtues.

For added beauty, there is a lower, longer silhouette... greater simplicity and dignity of line... and new interior elegance and luxury.

For improved comfort, there is increased spaciousness... new convenience of appointments... and a ride that is unbelievably quiet and smooth.

For finer performance, there is greater power...

more responsive handling... and a degree of all-around road ableness that is new even to Cadillac.

For increased safety, there is a new dual braking system... a new three-phase rear warning light system... and new cornering lights that illuminate your way around turns.

And we would like to say that even Cadillac quality has been enhanced for 1962. But the truth is simply that the car continues to be built to the highest standards that can be brought to the production of an automobile.

Stop by your dealer's showroom soon, won't you? He'll be happy to demonstrate to you what a difference a year can make—when the year is this one and the car is Cadillac.
