### Early Registration Important To Clinics

Pre-registration will be the key to the success of the mass Sabin oral vaccine program against polio on Oct. 21 and 28, Dr. Reginald H. Smart, chairman of the public health committee of the Los Angeles Medical Assn., declared yesterday.

"In order to try to immunize six million persons in Los Angeles County, clinics are going to require free and rapid movement," said Dr. Smart. "The controlling factor to assure this will be the number of persons who fill out registration blanks in advance and have them ready as they enter the clinics."

"These persons will be directed without delay into the Sabin vaccine lines and will finish in a matter of moments."

"THOSE WHO do not have their registration forms made out will be required to stop and do so and consequently may be held up in receiving their vaccine."

"A large number of unregistered persons could tie up a clinic unnecessarily."

Dr. Smart said representatives of the Los Angeles Medical Assn. were on hand in San Francisco at the Type I mass immunization program recently where a 92 per cent record was scored in Marin County.

"THE SECRET," he said, "was the fact such a large number of the persons had their filled-out forms in hand when they entered the clinics."

Forms very shortly will be available in many public places, doctors' offices and stores. Copies can be repro-

duced in newspapers and Dr. Smart said these would be acceptable at the clinics.

"If a family is going to the clinic in a group, all names can be included on one form," he declared. "If family members go separately, each one will need a separate registration."

"AT THE clinic, the filled-out form will be taken by a clerk and a receipt given. The person will make a 25 cent donation and will receive Sabin vaccination on a sugar cube placed inside a small paper cup. After popping the sugar cube in his mouth he will dispose of the cup and leave the building."

"We shall be geared to handle up to 10,000 persons at each clinic."

Sleep experts say a bed should be seven inches longer than the occupant.
