Dear Cheeks: I think you deserve to be canonized. Your brother-in-law is obligated by law to support his family and he should be made to do it. And YOUR family should not have to live like sardines because you've got kooky relatives.

Dear Ann Landers: You are good at solving other people's problems. How about taking a crack at this one?

$$x^2 - (4x - 2) = 0$$

$$x = ?$$

—MATH

Dear Math: My mathematics consultant, Michael F., tells me your problem is pretty dull and too easy to solve. Here is the answer:

$$x^2 - (4x - 2) = 0$$

$$x^2 - 4x + 2 = 0$$

$$x^2 - 4x + 4 - 2 = 0$$

$$(x - 2)^2 - 2 = 0$$

$$(x - 2)^2 = 2$$

$$x - 2 = \sqrt{2}$$

$$x = 2 + \sqrt{2}$$

Mr. F. presented what he described as a far more interesting problem and claims it has no solution. It is known as Fermat's Last Theorem. Mathematicians have been breaking their heads over this one for over 300 years.

All you geniuses who figured out how long it would take me to iron the bedsheets laid end to end from Ithaca, N. Y. to Chicago, should have
