Classroom in the sky. You might not guess it, but these men are in school. They're learning how to climb telephone poles safely and to string lines that will carry your calls. This course is just one of the many given in telephone schools up and down the Coast. Others, for example, train operators, business office people, installers. Such training gives telephone people the skills they need to do their jobs faster, better, cheaper . . . and more safely, too. Thus, they're better able to bring you good telephone service that's low in price. Pacific Telephone works to make your telephone a bigger value every day.
