

MADONNA ROW, one of the annual Christmas traditions of El Camino college, is lighted nightly in front of the college Administration building, 16008 S. Crenshaw blvd. Newest of the seven reproductions is Lorenz Lotto's "Rest

on the Flight to Egypt." Pictured above are student reproductions of Raphael's "Madonna Temp" and Botticelli's "The Virgin With the Child."

THERE WILL BE MUSIC on the El Camino college campus, following the installation of new carillon bells. Bill Flewelling, who composed the music to the college alma mater, returned to the campus Wednesday to play the bells for the first time at dedication ceremonies. A music major while at El Camino, Flewelling is now a student at Whittier college.

EC First Junior College To Install Carilionic Bells

El Camino college became the World's first junior college to install Carilionic bells this week as dedication ceremonies were conducted on campus Wednesday.

The chimes, financed by the Associated Student Body of the college, are housed in the newly constructed little theatre on campus. Christmas carols will be played on campus during the pre-holiday season. After the holidays, the college alma mater and a series of well-known songs will be played daily.

"The approximate cost of the instrument was \$5000," Carl G. Arfwedson, director of business, announced. Funds came from the student body contingency fund.

How It Works
The Carilionic bells instrument is known as a coronation carillon and is development of Schulmerich Carillons, Inc., of Sellersville, Pennsylvania. The instrument consists of 25 miniature bell tone generators of bronze bell metal which are struck by metal hammers, producing exact true bell tones almost inaudible to the human ear. These bell vibrations are then amplified over 100,000 times by means of specially designed electronic equipment, producing true bell music with all the depth and richness of traditional cast bells of massive proportions.

The instrument provides the tonal equivalent of 79,462 pounds of cast bells tuned to the finest English standards.

The range is G below Middle C to G two octaves above and it is interesting to note that the low G bell is equal in tone to a cast bell weighing 13,250 pounds.

The Carilionic bells instrument will be played from a special keyboard located at the organ console. Selector switches will permit the bells to be heard within the theater alone, from the tower alone, or both together.

Automatic Program
Automatic daily programs on the Coronation carillon will be provided by means of the Schulmerich Automatic Roll Player which is included. This instrument, which is neither a phonograph nor a wire-recording device, actually plays the bells through the use of perforated plastic rolls. These rolls activate the circuits which strike the Carilionic bells tone generators, duplicating the performance of an artist at the keyboard. Made of a durable plastic material, the rolls are formed as an endless belt and the Roll Player can be set to play a single desired selection or an extended program.

Automatic operation of the roll player is controlled by a calendared clock which can be set to play the carillon at any time of the day.

The bells will sound the traditional Westminster Chime and strike the hours throughout the day as a public service to the people of the community.

Bill Flemming, composer of the college alma mater, played the instrument for the first

Drag Strip Results Announced

Results of activities on the Lions club drag strip at 223rd St. and Alameda, were as follows Sunday, December 18:

GAS CLASSES	
351-Robert Richardson	51.46
405-Essex-Hudson	51.46
429-Sandoval Brakavill, Merc	53.94
