

## A salute to Torrance - - All-America City

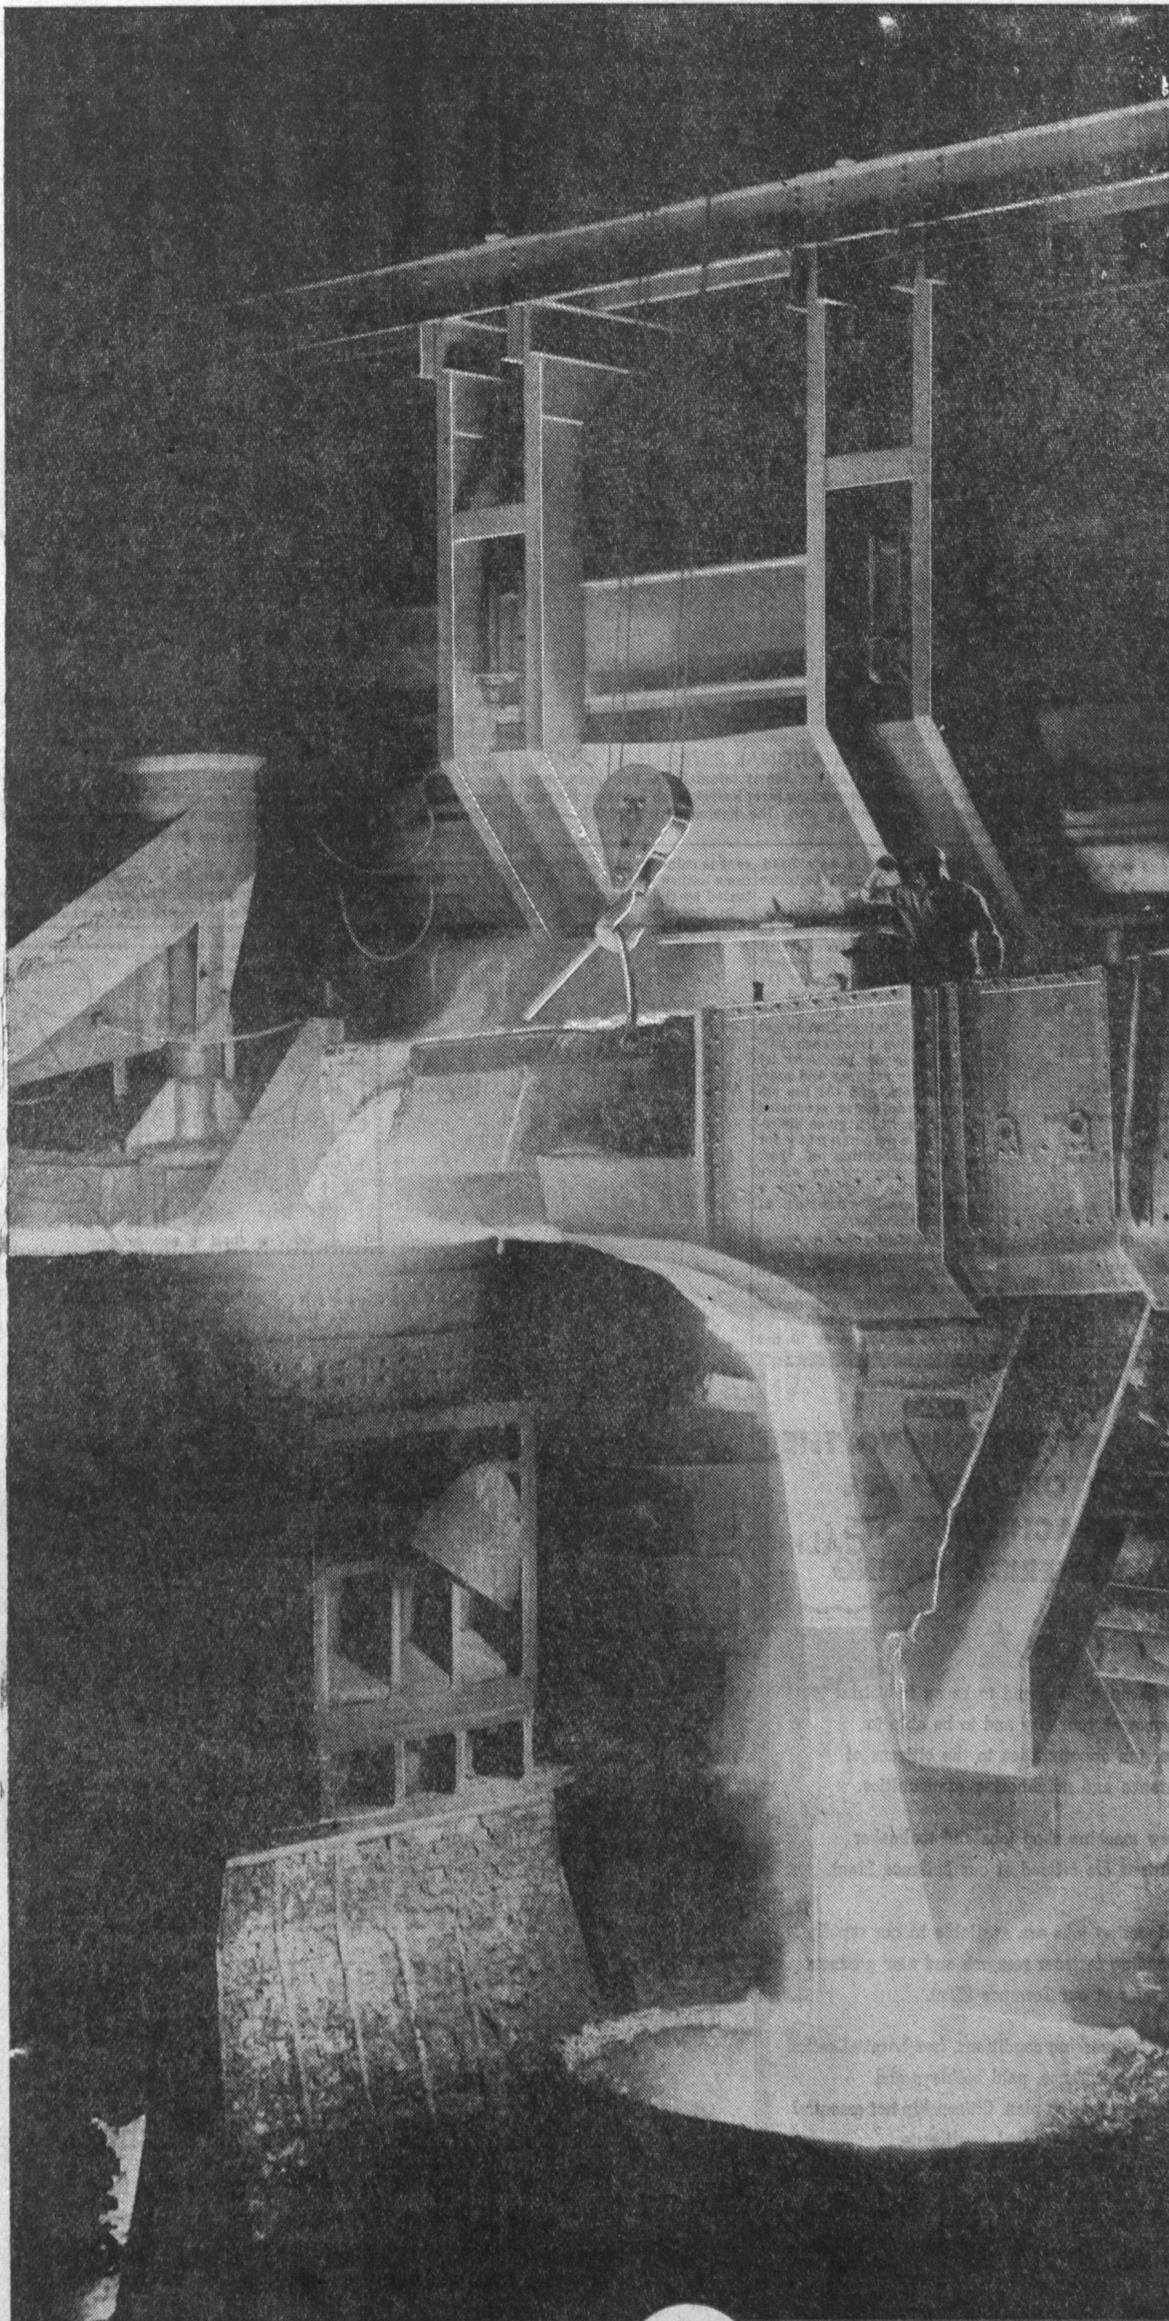

Today, United States Steel operates mines and manufacturing plants from coast to coast—eight of them in the state of California alone.

Whenever one of our "home communities" is selected for national acclaim, it is a matter of pride to the entire U. S. Steel family.

Thus, when Torrance was hailed as an "All-America City," outstanding for the imagination and hard work with which its people have handled pressing community problems, we could well understand the spirit which prompted the sounding of sirens and bells throughout the city.

In fact, the whistle at U. S. Steel's Torrance Plant was one of those which joined in the enthusiasm. Torrance has long been one of our home communities. Hundreds of Torrance residents are valued members of the U. S. Steel family.

United States Steel congratulates the people of Torrance on this signal honor. In the future as in the past we will continue to cooperate with energy, enterprise and faith as your partner in Torrance progress.

Watch the UNITED STATES STEEL HOUR on television, alternate Wednesdays, 7 P.M., KNXT, Channel 2.
