HOW TO AVOID ON THE JOB EYESTRAIN!

A New Approach

What's the visual range of your job? From close-up to 30 inches? From reading range to beyond arm's length? If you wear glasses, it is imperative that visual corrections match your working pattern. Otherwise, eyestrain is inevitable. Let us make a "working area analysis" of your job. From this data, lenses can be ground in our own laboratories to provide exactly the corrections you need.
