YOUR SENATOR REPORTS:

New Highways to Relieve Area Traffic Congestion

by Senator Richard Richards
The new budget just adopted by the State Highway Commission for the 1958-59 fiscal year will materially extend freeway construction in Los Angeles County.

It will also bring freeway access to a number of communities which have been experiencing an increasingly pressing need for speedier transportation facilities.

The allocation of \$8,700,000 for the eight lane extension of the Harbor freeway from 124 to 190 st., is especially good news for the cities of Orange, Compton, and Gardena and other communities in the harbor area. Of the total sum, \$6,000,000 will be financed in the 1958-1959 fiscal year.

City councils and chambers of commerce in these cities have all been working hard for this particular extension, and their cooperation has been most helpful in obtaining the additional five miles represented by the newly budgeted extension.

LONG BEACH FREEWAY
Also of interest to the harbor area is the addition of a 6-lane extension of three and a half miles to the Long Beach freeway between the Santa Ana and San Bernardino freeways.

Another area that has felt the pinch of increasing congestion and lack of rapid access to central locations is the San Fernando valley, which will benefit to the extent of \$26,000,000 in the new state highway budget. This amount will provide for

the completion of the Ventura freeway (U.S. 101) within the valley west of the junction with the Hollywood freeway; and the extension of the Golden State freeway (U. S. 99), through and north of Burbank. Two units one of them the largest single project in state highway history, will fill in the present gaps in the Ventura freeway west of North Hollywood.

This record-breaking project, estimated to cost a total of \$11,100,000 will cover the 4-mile section between Laurel Canyon Blvd. and the interchange now under construction at the junction of the San Diego freeway.

OTHER CONSTRUCTION
The other construction item on the Ventura freeway is for the section between Encino avenue and slightly west of Kevin avenue, estimated at a total of \$7,300,000. This work will connect two sections now under construction one between Sepulveda Blvd. and Encino ave., and the other between Kevin ave. and Calabasas.

On the Golden State freeway, the major project in the San Fernando Valley provides for nearly four miles of construction between Burbank and Roscoe blvds. This freeway work will adjoin the construction scheduled to begin shortly between Alameda ave. and Burbank Blvd., which in turn adjoins the recently completed section between the Los Angeles River and Alameda ave.

North American Buys From 10,350 Concerns

Over 85 per cent of the total outside purchases of materials, parts, subcontracts and services Inc., and its divisions during the 1957 fiscal year were made with North American Aviation, 10,350 small business concerns—those with 500 or less employees—Rulon Nagely, corporate director of material, announced this week. This amounted to \$209,246,283.

The YWCA of the U.S.A. helps train leaders from YWCAs on every continent. Training acquired here is passed on to hundreds of others when trainees return to their home YWCAs. or 47.1 per cent of the total \$444,609,332 spent outside the company, according to the Material dept.'s regular Sept. 30 fiscal year end report, released this week.
