

Employment Office Starts Special Placement Service

Qualified residents of Torrance and vicinity interested in professional and managerial employment outside of California now have the benefit of a national listing of more than 6100 such jobs, Winona Ellis, manager of the Torrance office of the Department of Employment, located at 1628 Cravens ave., announced this week.

She said the Department of Employment is participating with other state employment security agencies in a nationwide expanded and specialized placement service for professional and managerial workers which provides for an exchange of unfilled job openings between states.

In California, the Department of Employment's commercial and professional offices in Los Angeles and San Francisco have been designated as two of 78 special employment centers to speed up the matching of applicants and jobs in professional and managerial occupations on a nationwide basis.

These offices have on file at all times a nation wide list of job opportunities in the professional and managerial fields. Mrs. Ellis said she would send in qualifications of local applicants for matching with the nation wide list. When the qualifications of an applicant fit an opening in another state and the applicant is interested in the job, the Torrance office will communicate directly with the out-of-state local employment office which holds the job opening to arrange for an interview between employer and applicant. She urged those interested in employment in other states to apply.

Largest numbers of job openings on the current national list are for mechanical engineers and electrical engineers.

The list, which includes many different professional and managerial occupations, indicated a strong demand for nurses and for draftsmen. Other occupations with numerous job openings available include chemists and chemical engineers, civil engineers, natural and social scientists, laboratory technicians, social and welfare workers, and retail managers.

Employers in Torrance and vicinity who wish to utilize the nationwide network to find professional and managerial personnel also may do so by filing their requests with the local office of the Department of Employment.

The expansion of the nationwide placement service in professional and managerial occupations was arranged through the cooperation of state employment security agencies affiliated with the U. S. Department of Labor's Bureau of Employment Security.

Newsman Says Khrushchev May Fall in 1958

Nikita Khrushchev may not survive 1958 in power because of his health and because of opposition groups.

That's the opinion of NBC News' Moscow Correspondent Irving R. Levine, as expressed last week on the special NBC news "Hot Seat" series.

Levine said that Khrushchev has been suffering from a kidney ailment for some time. This, plus the groups he has antagonized in seizing power, could oust him, Levine said.

The NBC newsman also reported that living conditions are improving for Russians—though far behind this country—and that the Russian people have a deep-rooted dread of war.

SKIPPERETTES Jill Adrian, Dorothy Shewy (standing) and Peggy Jacobson, Miss California in recent Miss Universe Contest, decorate one of the many late model boats that will be displayed January 10-19 at the Great Western Boat Show in the Great Western Exhibit Building, Santa Ana Freeway at Atlantic Blvd.

Boat Show Opens Friday

Scores of latest type boats and hundreds of improved equipment items will be previewed for the 1958 boating season January 10-19 at the Great Western Boat Show, H. Warner Buck and Mel Morrison, show producers, said this week.

This first major 1958 boat show will be held at Great Western Exhibit Building, Santa Ana freeway at Atlantic Blvd., which was recently expanded to 120,000 square feet of roofed display area by completion of a new building.

"People who haven't looked at a boat for a few years will hardly recognize the new models," Morrison and Buck said.

"High styling, tougher and lighter materials, more powerful motors with less weight, and amazing new accessories have been developed all along the line.

"The result is comfort, beauty, stability and reliability never dreamed of a few years ago."

Among equipment items shown will be trailers for virtually every size and model boat and latest water skiing paraphernalia.

The spacious exhibit area offers adequate paved parking. Show hours will be from 1 to 11 p.m.

Four TV Films To Show Views Of 'Rome Eternal'

Two thousand years of Christian history will be reviewed in four, half-hour films—for the first time on TV—when NBC-TV's "The Catholic Hour" presents "Rome Eternal" on the Sunday afternoons of January 5, 12, 19 and 26 at 10:30 a.m. The January 26 program will include an audience with Pope Pius XII.

"Rome Eternal" is the story of Rome as told by its churches, shrines and art.

It was filmed on location last summer and the narration was written by Paul Horgan, author of the Pulitzer Prize-winning "Great River: The Rio Grande in American History."

Jacques Belasco, who for many years wrote the music for "The Greatest Story Ever Told" radio series, composed the music for "Rome Eternal."

The first chapter of "Rome Eternal" is entitled "The City of Peter" and tells the story of the transition from paganism to Christianity. Television audiences will see the old Apian way and the excavations under St. Peter's basilica.

The second chapter, "The City of Peter," seen on January 12, portrays the growth of Christianity in its early days—the victory of Constantine at the Milvian Bridge, the liberation of the church, and the studies of St. Jerome.

On January 19, in "Renaissance Rome," the third of the series, television audiences will see how Christian rats flowered during the Renaissance. Highlights of "Renaissance Rome" include glimpses of the treasures of the Vatican Museum, the Borgia apartments and the art of Michelangelo.

An audience with the Pope is the main feature of "Our Moment in Time," the last of the "Rome Eternal" series. Scheduled for January 26, the film will show the interior and exterior of Vatican City and the Pope's apartments, and the Vatican post office, mosaic factory and radio studios.

Bleeding Gums Cause Loss of Teeth

"The gums around my lower front teeth bleed very easily. How can this condition be cured?" asks Mrs. R. K. of Lomita.

Bleeding of the gums around the teeth might be caused by either of two things—tartar accumulation irritating the gums or excessive pressure caused by chewing mainly towards the front of the mouth.

Where the back teeth are missing and not replaced, the two jaws will come closer together than they should so that the upper front teeth come down over the lower more than they did before. Overlapping creates more pressure, resulting in strain on the teeth and damage to the bony support, which in turn is accompanied by inflammation and congestion of the gums. Then, the gums bleed easily.

So you can see that bleeding of the gums around the front teeth often comes as a result of missing teeth in the back of the mouth. This is also aggravated by tartar accumulations on the inside surfaces of the teeth.

If these conditions are not corrected, the overtaxed teeth will be endangered. Of course, there are other causes for bleeding gums but the two above are among the most prominent.

Auto Registration Renewal Open Through February 4

The 1958 auto registration renewal period opened officially January 2 with 120 permanent State Department of Motor Vehicles field offices, 18 DMV travel crews, and 142 banks and 125 automobile club offices ready to serve the motoring public.

The department's permanent offices and travel crews and the auto club stations are set up to handle all types of registrations, from passenger cars, trailers and motorcycles to commercial vehicles. The temporary bank stations (see list in your area) will issue renewals only to those vehicles for which prepared fee statements were received by the owners.

The renewal period runs from January 2 through February 4. Service at all permanent Department of Motor Vehicles offices will be from 8 a.m. to 5 p.m., Monday through Friday, and from 8 a.m. to noon on Saturdays of January 4, 11, 18, and 25, and February 1. Bank station and auto club service will be during regular business hours of those institutions.

Car owners who have received their registration renewal cards were reminded by Motor Vehicles Director Paul Mason today that both portions of the perforated statement must be submitted intact when paying the 1958 fees.

"Do not detach the stub when remitting fees either by mail or in person," Mason said, adding: "And pay only the 1958 fees, as printed on both parts of the card. In the lower right hand

corner of the small portion of the card, there is printed the amount of fees that will be due in 1958. This is designed as a convenience for paying next year's fees, and should be ignored when remitting the 1958 fees."

Mason said that by this time, most owners should have received their statements, but because of change of address many owners may experience a delay. Wherever possible, the postoffice will forward to the owner's new address.

Here are some tips that will save time when attaching the 1958 green sticker to the auto license plate:

1. Don't try to remove the old 1957 red sticker. You'll only make a mess of it.
2. Remove any wax or road dirt from the old sticker.
3. Warm the area covered by the sticker by briefly pressing the palm of your hand to it.
4. Apply the new 1958 sticker over the old, following instructions printed on the back.

ANOTHER FIRST

This is the 350th anniversary of the founding of the first business in America in 1608, which was a sawmill erected at Jamestown in what is now Virginia. However, wood products have been found in ancient mounds in the Southwest that date back hundreds of years more, and were products of mysterious cliff dwellers.
