Saxons to Have 180 Exhibits At Huge Annual Science Fair

North High students will have some of the latest space age developments brought to their doorsteps on Monday and Tuesday as the school observes its third annual Science Days.

The big science show will include more than 180 exhibits, lectures, and films from leading industries and educational institutions in this area. A number of student projects and experiments also will be featured.

Leading industrial displays will be featured for the benefit of students and the general public, as well as latest Space Age developments including a Vanguard Satellite, robot, drone plane, X-15 model, and many others.

North High students will be able to attend lectures and see the displays on Monday, while the show will be open to the public from 7 to 11 p.m. Monday night. On Tuesday, eighth grade students from nearby elementary schools will be invited to see and hear the program.

Lectures on science from leading industrial and educational groups are slated. Speakers will include representative of UCLA,

OUTER SPACE EXPRESS—The X-15, which will be one of many top industrial and scientific displays at North High's third annual Science Days, April 20 and 21, is previewed by NHS Student Body President Pat Reynolds and Gene Ricketts, North American general foreman of the experimental assembly. More than 180 exhibits, lectures and films are scheduled for students and public at the big school science exhibit.

Street Improvement
Improvement of 223rd St. from Main St. to 350 feet easterly in the Wilmington-Dominguez area is scheduled to begin this week, according to Supervisor Burton W. Chace.

The work will consist of a slight realignment of 223rd St. to eliminate the jog at Main St. and widening the existing pavement on the north side of the street to provide four full traffic lanes. Traffic signals will later be installed at this intersection.

You're steadier... more secure...

...in a road-hugging Wide-Track Pontiac!

Take all its beauty, balance it gracefully on a wider, steadier wheel design and you have a car the likes of which you've never owned. The wheels are five inches farther apart. This widens the stance, but not the car. You're secure at the controls, more comfortable from head to toe. There's a noticeable lack of lean and sway. Narrow track cars fall far short by comparison. Wouldn't this be a good day for you to drive this sweet automobile? The keys are waiting.

THE ONLY CAR WITH WIDE-TRACK WHEELS

Dotted lines show conventional wheel positions. Pontiac's wheels are five inches farther apart. This widens only the stance, not the car itself. Pontiac takes a better grip on the road, hugs tighter on curves and corners. Sway and lean are considerably reduced, ride is smoother, balanced, steadier.
