## WHAT'S DOING

R. S. Pyle, your Telephone Manager in Torrance

**Deep on the ocean floor, underseas telephone cables carry calls from this country to Alaska, Hawaii and Europe. A cable ship like the one above put them there—to stay. Just imagine the problems involved if anything should go wrong with one of these cables—sending out a repair ship, locating the trouble spot, fishing up the cable. It could cost as much as \$250,000! So telephone engineers had to design all the tubes and tiny electronic parts that go into an underseas cable to work continuously for at least 20 years without attention. That's the kind of telephone know-how, backed by constant research, that makes your service more dependable... whether you call across town or across the world.**

**A lot of housewives around here will likely be this busy soon. But here's what I'd like you to notice... that extension phone on the wall. It's going to save this lady plenty of steps at canning time, and all those other days when pots need watching. Why not see us about a step-saving extension for your kitchen? Pacific Telephone**
