What's doing?

The history of telephoning is a history of change—from the first commercial shoebox-like phone of 1877 down to the pretty, little Princess phone of today. Telephone scientists are continually at work, developing and testing new ideas in phones of the future—like the one which lets you see the person you're talking to. Every change is made for one reason: to make your telephone serve you better.

On Christmas day, 33 years ago, telephone lines carried the first radio broadcast of a complete opera—"Hansel and Gretel." It was transmitted coast-to-coast from the Metropolitan Opera House in New York.

It's wise to have a list of emergency phone numbers on hand. But, if you don't just dial zero for your Torrance telephone operator. She has all vital numbers and the training to meet emergencies. Just give her your name and number and as much information as you can. And, here's a tip for making a "0" call in the dark: The "0" is the first dial opening below the stop bar.

Did you hear about the man who planned to dine at all the restaurants listed in the Yellow Pages of a big city's phone book? Fortunately, he can find REDUCING METHODS in that same book.

Christmas . . .
a time for joy and thankful prayer for giving gifts to show we care for children's laughs and sparkling eyes and gala feasts and pumpkin pies for songs and carols, old and new and Christmas trees and stockings too for loved-ones traveling far and near to share this special time of year . . . whatever Christmas means to you add our "Best Wishes" the whole year through.
