Music Club Will Open New Season

The South Bay Chamber Music Society, currently engaged in a patron, membership, and ticket sale drive for the second annual winter-spring concert series, is under the direction of Dr. Ruben F. Mettler, president of TRW Space Technology Laboratories, Inc.

The opening concert will feature the Los Angeles String Quartet and clarinet soloist Mitchell Lurie at the Redondo Union High School Auditorium Jan. 30 at 8:30 p.m.

Luri, who has been described as being in a class of one among clarinetists, is a graduate of the Curtis Institute of Music in Philadelphia and has appeared as soloist in the symphony orchestras of Pittsburgh and Chicago. He is currently a lecturer in clarinet and wind chamber music at the University of California at Los Angeles and head of the woodwind department at the Music Academy of the West in Santa Barbara.

Further information may be obtained by telephoning or writing the South Bay Chamber Music Society, FR 5-6935, 5507 Calle de Arboles, Torrance, according to Mettler.

I would like to warn you again not to cut back any frost damaged plants until all danger of further frost is over. You should not water frost damaged plants more than enough to keep them alive until the frost danger is over. When you see the first new growth start later this season and you are sure there will be no more frost—then and only then prune back all the damaged area and start your regular watering program. It would be well at that time to add Vitamin B1 solution to the water but no fertilizer.

Watch carefully for insects. Snails particularly like these tender new leaves. Snail bait or pellets will take care of them. If aphids attack the new growth, spray with a mild nicotine spray.

Remember, a frost damaged plant is like a sick child and must be treated gently. In most cases a little care is all it needs.
