

Tips on Information Service Offered

Los Angeles County telephone subscribers will receive faster information service for numbers in Orange County if they dial direct by calling 714-555-1212, said Jim Leggett, local manager of Pacific Telephone.

By dialing the area code (714) and the universal information number (555-1212), local callers will be connected to one of 300 skilled operators in Orange County who are familiar with community names.

"Los Angeles County subscribers call information more than 200,000 times every day and our local operators sometimes must search through five different directories with more than 1,720,000 different listings to find a number," Leggett said. "Orange County has another 400,000 listings and operators there are much more proficient in locating numbers in that area and can supply faster service."

"Our local operators handle a request in an average of 30 seconds, but it would take much longer if they have to find out where towns like Villa Park, Glorietta, Centralia or Modjeska Canyon are."

Leggett said Orange County operators are familiar with all of these places and frequently called numbers in that area are posted on a special list in each operator's booth.

"These numbers include government agencies, large industrial firms, newspapers and shopping centers. These particular numbers can be found in as little as three or

four seconds, sometimes causing the caller to think the operator has extra sensory perception," Leggett said.

Garden Checklist

1. When spraying roses and other plants, be sure to hit the undersides of leaves. Some insects may escape the spray if you don't.
2. Tomato plants may still be set out now. Set them slightly deeper in the ground than they were growing in nursery containers.
3. Pinch out the growing tips of new bedding plants after transplanting them from nursery flats. This encourages bushier growth, sturdier plants and more bloom later on.
4. Mulch around fuchsias with peat moss, bark or steer manure. Feed them frequently and pinch back new growth to promote side branching.
5. Dahlias may still be planted for summer-fall bloom. The dwarfs may be planted as bedding plants. Larger varieties are started from tubers. These later bloom in 60 to 90 days.
