Electric cooking doesn't blacken pots and pans. Or kitchen walls. Or ceilings. Or curtains. Reason: electric cooking is flameless. Another boon: top-of-the-range control is so exact butter melts without burning, and heat is so evenly distributed foods get cooked without constant stirring.

Many of the new electric ranges have self-cleaning ovens. Imagine never having to do that dirty job again!

**CITIZEN OF THE MONTH**

Dwight Crum cares for the kids — the safety, the skill, the survival of surfers that dot the South Bay shoreline.
